SUBJECT INDEX

Absorption

Applying Covercrete Absorption Test to In-Situ Tests on Structures, G. E. Blight and B. J. Lampacher, MT Feb. 95, p1-8.

Acoustics

Acoustic-Emission Kaiser Effect in Fly-Ash Cement Mortar under Compression, M. T. Tam and C. C. Weng, MT Nov. 95, p212-217.

Evaluation of Plastic Damage in Concrete by Acoustic Emission, Ahmed M. Farahat and Masayasu Ohtsu, MT Aug. 95, p148-153.

Admixtures

Review of Expansive Alkali-Aggregate Reactions in Concrete, J. E. Gillott, MT Nov. 95, p278-282.

Aggregates

Building and Nonpavement Applications of No-Fines Concrete, Nader Ghafoori and Shivaji Dutta, MT Nov. 95, p286-289.

Fracture Mechanical Behavior of Aggregate–Cement Matrix Interfaces, E. K. Tschegg, H. M. Rotter, P. E. Roelfstra, U. Bourgund and P. Jussel, MT Nov. 95, p199-203.

Review of Expansive Alkali-Aggregate Reactions in Concrete, J. E. Gillott, MT Nov. 95, p278-282.

Aging

HP-GPC Characterization of Asphalt Aging and Selected Properties, Eleni Vassiliadou Churchill, Serji N. Amirkhanian and James L. Burati, Jr., MT Feb. 95, p41-49.

Methodology for Defining LMS Portion in Asphalt Chromatogram, Kwang W. Kim, James L. Burati, Jr. and Je-Seon Park, MT Feb. 95, p31-40.

A Nonlinear Differential Equation for Modeling Asphalt Aging, Norman W. Garrick, MT Nov. 95, p265-268.

Air entrainment

Frost Resistance of Roller-Compacted High-Voltage Fly Ash Concrete, Michel Pigeon and V. Mohan Malhotra, MT Nov. 95, p208-211.

Algorithms

Two-Dimensional Magnetic Algorithm to Detect Reinforcing Steel, Craig M. Newtson and Marc O. Eberhard, MT Aug. 95, p141-147.

Alkalinity

Review of Expansive Alkali-Aggregate Reactions in Concrete, J. E. Gillott, MT Nov. 95, p278-282.

Asphalt cement

Correspondence Principle for Characterization of Asphalt Concrete, Y. R. Kim, Y. C. Lee and Y. R. Kim, MT Feb. 95, p59-68.

HP-GPC Characterization of Asphalt Aging and Selected Properties, Eleni Vassiliadou Churchill, Serji N. Amirkhanian and James L. Burati, Jr., MT Feb. 95, p41-49.

Asphalt mix design

Evaluation of Polymer-Modified Asphalt Concrete Mixtures, Xicheng Qi, Peter E. Sebaaly and Jon A. Epps, MT May 95, p117-124.

Asphalt pavements

A Nonlinear Differential Equation for Modeling Asphalt Aging, Norman W. Garrick, MT Nov. 95, p265-268.

Asphalts

Methodology for Defining LMS Portion in Asphalt Chromatogram, Kwang W. Kim, James L. Burati, Jr. and Je-Seon Park, MT Feb. 95, p31-40.

A Nonlinear Differential Equation for Modeling Asphalt Aging, Norman W. Garrick, MT Nov. 95, p265-268.

Beams

Fracture Energy Determination of Quasi-Brittle Materials, Robert Y. Liang and Yuan-Neng Li, MT Aug. 95, p168-173.

Bending

Fracture Energy Determination of Quasi-Brittle Materials, Robert Y. Liang and Yuan-Neng Li, MT Aug. 95, p168-173.

Bentonite

Permeability of Clay-Modified Fly Ash under Thermal Gradients, Lorraine N. Fleming and Hilary I. Inyang, MT Aug. 95, p178-182.

Bitumen

Bitumen Coating versus Plastic Sheeting for Reducing Negative Skin Friction, Kamal S. Tawfiq and Joseph A. Caliendo, MT Feb. 95, p69-81.

Bituminous coatings

Bitumen Coating versus Plastic Sheeting for Reducing Negative Skin Friction, Kamal S. Tawfiq and Joseph A. Caliendo, MT Feb. 95, p69-81.

Bonding

Bond Properties of Carbon Fibers in Cementitious Matrix, Amnon Katz, Victor C. Li and A. Kazmer, MT May 95, p125-128.

Bonding strength

Performance of Repair Materials Exposed to Fluctuation of Temperature, A. S. Al-Gahtani, Rasheeduzzafar and A. A. Al-Mussallam, MT Feb. 95, p9-18.

Use of Composites for Rehabilitation of Steel Structures—Determination of Bond Durability, V. M. Karbhari and S. B. Shulley, MT Nov. 95, p239-245.

Bridges, concrete

Thermal Expansion of Concretes: Case Study in Iowa, Udeme J. Ndon and K. L. Bergeson, MT Nov. 95, p246-251.

Bridges, steel

Use of Composites for Rehabilitation of Steel Structures—Determination of Bond Durability, V. M. Karbhari and S. B. Shulley, MT Nov. 95, p239-245.

Buildings

Building and Nonpavement Applications of No-Fines Concrete, Nader Ghafoori and Shivaji Dutta, MT Nov. 95, p286-289.

Case reports

Thermal Expansion of Concretes: Case Study in Iowa, Udeme J. Ndon and K. L. Bergeson, MT Nov. 95, p246-251.

Cellular structures

Building and Nonpavement Applications of No-Fines Concrete, Nader Ghafoori and Shivaji Dutta, MT Nov. 95, p286-289.

Cements

Acoustic-Emission Kaiser Effect in Fly-Ash Cement Mortar under Compression, M. T. Tam and C. C. Weng, MT Nov. 95, p212-217.

Bond Properties of Carbon Fibers in Cementitious Matrix, Amnon Katz, Victor C. Li and A. Kazmer, MT May 95, p125-128.

Building and Nonpavement Applications of No-Fines Concrete, Nader Ghafoori and Shivaji Dutta, MT Nov. 95, p286-289.

Fracture Mechanical Behavior of Aggregate–Cement Matrix Interfaces, E. K. Tschegg, H. M. Rotter, P. E. Roelfstra, U. Bourgund and P. Jussel, MT Nov. 95, p199-203.

Performance of Repair Materials Exposed to Fluctuation of Temperature, A. S. Al-Gahtani, Rasheeduzzafar and A. A. Al-Mussallam, MT Feb. 95, p9-18.

Soil Modification by Cement Kiln Dust, Z. A. Baghdadi, M. N. Fatani and N. A. Sabban, MT Nov. 95, p218-222.

Chemicals

Method for Determining Ice Undercut Temperature of Deicing Chemicals, Morris Mauritis, James McGraw and Ji-Won Jang, MT Feb. 95, p84-86.

Chromatographic analysis

HP-GPC Characterization of Asphalt Aging and Selected Properties, Eleni Vassiliadou Churchill, Serji N. Amirkhanian and James L. Burati, Jr., MT Feb. 95, p41-49.

Methodology for Defining LMS Portion in Asphalt Chromatogram, Kwang W. Kim, James L. Burati, Jr. and Je-Seon Park, MT Feb. 95, p31-40.

Coefficients

Thermal Expansion of Concretes: Case Study in Iowa, Udeme J. Ndon and K. L. Bergeson, MT Nov. 95, p246-251.

Composite materials

Bolted Connections for Fiber-Reinforced Composite Structural Members: Experimental Program, Charles N. Rosner and Sami H. Rizkalla, MT Nov. 95, p223-231.

Fracture Mechanical Behavior of Aggregate–Cement Matrix Interfaces, E. K. Tschegg, H. M. Rotter, P. E. Roelfstra, U. Bourgund and P. Jussel, MT Nov. 95, p199-203.

Permeability of Clay-Modified Fly Ash under Thermal Gradients, Lorraine N. Fleming and Hilary I. Inyang, MT Aug. 95, p178-182.

Composite structures

Use of Composites for Rehabilitation of Steel Structures—Determination of Bond Durability, V. M. Karbhari and S. B. Shulley, MT Nov. 95, p239-245.

Compression

Acoustic-Emission Kaiser Effect in Fly-Ash Cement Mortar under Compression, M. T. Tam and C. C. Weng, MT Nov. 95, p212-217.

Compression Creep of Pultruded E-Glass-Reinforced-Plastic Angles, Ghyslaine McClure and Yaghoub Mohammadi, MT Nov. 95, p269-276.

Laboratory Investigation of Compacted No-Fines Concrete for Paving Materials, Nader Ghafoori and Shivaji Dutta, MT Aug. 95, p183-191.

Compressive strength

Minimum Length of Curing of Silica Fume Concrete, Mohammad Shamim Khan and Michael E. Ayers, MT May 95, p134-139.

Concrete

Correspondence Principle for Characterization of Asphalt Concrete, Y. R. Kim, Y. C. Lee and Y. R. Kim, MT Feb. 95, p59-68.

Dielectric Properties of Portland Cement Concrete at Low Radio Frequencies, I. L. Al-Qadi, O. A. Hazim, W. Su and S. M. Riad, MT Aug. 95, p192-198.

Evaluation of Plastic Damage in Concrete by Acoustic Emission, Ahmed M. Farahat and Masayasu Ohtsu, MT Aug. 95, p148-153.

Evaluation of Polymer-Modified Asphalt Concrete Mixtures, Xicheng Qi, Peter E. Sebaaly and Jon A. Epps, MT May 95, p117-124.

Experimental Observation of Microstructural Behavior of Concrete, Ahmed M. Farahat, Masashi Kawakami and Tada-aki Tanabe, MT May 95, p87-95.

Fracture Energy Determination of Quasi-Brittle Materials, Robert Y. Liang and Yuan-Neng Li, MT Aug. 95, p168-173.

Interdependence of Creep and Shrinkage for Concrete under Tension, Konstantin Kovler, MT May 95, p96-101.

Minimum Length of Curing of Silica Fume Concrete, Mohammad Shamim Khan and Michael E. Ayers, MT May 95, p134-139.

Review of Expansive Alkali-Aggregate Reactions in Concrete, J. E. Gillott, MT Nov. 95, p278-282.

Theoretical Prediction of Drying Shrinkage of Concrete, Man Yop Han and Robert L. Lytton, MT Nov. 95, p204-207.

Thermal Expansion of Concretes: Case Study in Iowa, Udeme J. Ndon and K. L. Bergeson, MT Nov. 95, p246-251.

Concrete durability

Applying Covercrete Absorption Test to In-Situ Tests on Structures, G. E. Blight and B. J. Lampacher, MT Feb. 95, p1-8.

Concrete, reinforced

Behavior of Concrete Slabs Reinforced with Fiber-Reinforced Plastic Grid, N. Banthia, M. Al-Asaly and S. Ma, MT Nov. 95, p252-257.

Resistance of Silica-Fume Concrete to Corrosion-Related Damage, Safwan A. Khedr and Ahmed F. Idriss, MT May 95, p102-107.

SUBJECT INDEX

Absorption

Applying Covercrete Absorption Test to In-Situ Tests on Structures, G. E. Blight and B. J. Lampacher, MT Feb. 95, p1-8.

Acoustics

Acoustic-Emission Kaiser Effect in Fly-Ash Cement Mortar under Compression, M. T. Tam and C. C. Weng, MT Nov. 95, p212-217.

Evaluation of Plastic Damage in Concrete by Acoustic Emission, Ahmed M. Farahat and Masayasu Ohtsu, MT Aug. 95, p148-153.

Admixtures

Review of Expansive Alkali-Aggregate Reactions in Concrete, J. E. Gillott, MT Nov. 95, p278-282.

Aggregates

Building and Nonpavement Applications of No-Fines Concrete, Nader Ghafoori and Shivaji Dutta, MT Nov. 95, p286-289.

Fracture Mechanical Behavior of Aggregate–Cement Matrix Interfaces, E. K. Tschegg, H. M. Rotter, P. E. Roelfstra, U. Bourgund and P. Jussel, MT Nov. 95, p199-203.

Review of Expansive Alkali-Aggregate Reactions in Concrete, J. E. Gillott, MT Nov. 95, p278-282.

Aging

HP-GPC Characterization of Asphalt Aging and Selected Properties, Eleni Vassiliadou Churchill, Serji N. Amirkhanian and James L. Burati, Jr., MT Feb. 95, p41-49.

Methodology for Defining LMS Portion in Asphalt Chromatogram, Kwang W. Kim, James L. Burati, Jr. and Je-Seon Park, MT Feb. 95, p31-40.

A Nonlinear Differential Equation for Modeling Asphalt Aging, Norman W. Garrick, MT Nov. 95, p265-268.

Air entrainment

Frost Resistance of Roller-Compacted High-Voltage Fly Ash Concrete, Michel Pigeon and V. Mohan Malhotra, MT Nov. 95, p208-211.

Algorithms

Two-Dimensional Magnetic Algorithm to Detect Reinforcing Steel, Craig M. Newtson and Marc O. Eberhard, MT Aug. 95, p141-147.

Alkalinity

Review of Expansive Alkali-Aggregate Reactions in Concrete, J. E. Gillott, MT Nov. 95, p278-282.

Asphalt cement

Correspondence Principle for Characterization of Asphalt Concrete, Y. R. Kim, Y. C. Lee and Y. R. Kim, MT Feb. 95, p59-68.

HP-GPC Characterization of Asphalt Aging and Selected Properties, Eleni Vassiliadou Churchill, Serji N. Amirkhanian and James L. Burati, Jr., MT Feb. 95, p41-49.

Asphalt mix design

Evaluation of Polymer-Modified Asphalt Concrete Mixtures, Xicheng Qi, Peter E. Sebaaly and Jon A. Epps, MT May 95, p117-124.

Asphalt pavements

A Nonlinear Differential Equation for Modeling Asphalt Aging, Norman W. Garrick, MT Nov. 95, p265-268.

Asphalts

Methodology for Defining LMS Portion in Asphalt Chromatogram, Kwang W. Kim, James L. Burati, Jr. and Je-Seon Park, MT Feb. 95, p31-40.

A Nonlinear Differential Equation for Modeling Asphalt Aging, Norman W. Garrick, MT Nov. 95, p265-268.

Beams

Fracture Energy Determination of Quasi-Brittle Materials, Robert Y. Liang and Yuan-Neng Li, MT Aug. 95, p168-173.

Bending

Fracture Energy Determination of Quasi-Brittle Materials, Robert Y. Liang and Yuan-Neng Li, MT Aug. 95, p168-173.

Bentonite

Permeability of Clay-Modified Fly Ash under Thermal Gradients, Lorraine N. Fleming and Hilary I. Inyang, MT Aug. 95, p178-182.

Bitumen

Bitumen Coating versus Plastic Sheeting for Reducing Negative Skin Friction, Kamal S. Tawfiq and Joseph A. Caliendo, MT Feb. 95, p69-81.

Bituminous coatings

Bitumen Coating versus Plastic Sheeting for Reducing Negative Skin Friction, Kamal S. Tawfiq and Joseph A. Caliendo, MT Feb. 95, p69-81.

Bonding

Bond Properties of Carbon Fibers in Cementitious Matrix, Amnon Katz, Victor C. Li and A. Kazmer, MT May 95, p125-128.

Bonding strength

Performance of Repair Materials Exposed to Fluctuation of Temperature, A. S. Al-Gahtani, Rasheeduzzafar and A. A. Al-Mussallam, MT Feb. 95, p9-18.

Use of Composites for Rehabilitation of Steel Structures—Determination of Bond Durability, V. M. Karbhari and S. B. Shulley, MT Nov. 95, p239-245.

Bridges, concrete

Thermal Expansion of Concretes: Case Study in Iowa, Udeme J. Ndon and K. L. Bergeson, MT Nov. 95, p246-251.

Bridges, steel

Use of Composites for Rehabilitation of Steel Structures—Determination of Bond Durability, V. M. Karbhari and S. B. Shulley, MT Nov. 95, p239-245.

Buildings

Building and Nonpavement Applications of No-Fines Concrete, Nader Ghafoori and Shivaji Dutta, MT Nov. 95, p286-289.

Case reports

Thermal Expansion of Concretes: Case Study in Iowa, Udeme J. Ndon and K. L. Bergeson, MT Nov. 95, p246-251.

Cellular structures

Building and Nonpavement Applications of No-Fines Concrete, Nader Ghafoori and Shivaji Dutta, MT Nov. 95, p286-289.

Cements

Acoustic-Emission Kaiser Effect in Fly-Ash Cement Mortar under Compression, M. T. Tam and C. C. Weng, MT Nov. 95, p212-217.

Bond Properties of Carbon Fibers in Cementitious Matrix, Amnon Katz, Victor C. Li and A. Kazmer, MT May 95, p125-128.

Building and Nonpavement Applications of No-Fines Concrete, Nader Ghafoori and Shivaji Dutta, MT Nov. 95, p286-289.

Fracture Mechanical Behavior of Aggregate–Cement Matrix Interfaces, E. K. Tschegg, H. M. Rotter, P. E. Roelfstra, U. Bourgund and P. Jussel, MT Nov. 95, p199-203.

Performance of Repair Materials Exposed to Fluctuation of Temperature, A. S. Al-Gahtani, Rasheeduzzafar and A. A. Al-Mussallam, MT Feb. 95, p9-18.

Soil Modification by Cement Kiln Dust, Z. A. Baghdadi, M. N. Fatani and N. A. Sabban, MT Nov. 95, p218-222.

Chemicals

Method for Determining Ice Undercut Temperature of Deicing Chemicals, Morris Mauritis, James McGraw and Ji-Won Jang, MT Feb. 95, p84-86.

Chromatographic analysis

HP-GPC Characterization of Asphalt Aging and Selected Properties, Eleni Vassiliadou Churchill, Serji N. Amirkhanian and James L. Burati, Jr., MT Feb. 95, p41-49.

Methodology for Defining LMS Portion in Asphalt Chromatogram, Kwang W. Kim, James L. Burati, Jr. and Je-Seon Park, MT Feb. 95, p31-40.

Coefficients

Thermal Expansion of Concretes: Case Study in Iowa, Udeme J. Ndon and K. L. Bergeson, MT Nov. 95, p246-251.

Composite materials

Bolted Connections for Fiber-Reinforced Composite Structural Members: Experimental Program, Charles N. Rosner and Sami H. Rizkalla, MT Nov. 95, p223-231.

Fracture Mechanical Behavior of Aggregate–Cement Matrix Interfaces, E. K. Tschegg, H. M. Rotter, P. E. Roelfstra, U. Bourgund and P. Jussel, MT Nov. 95, p199-203.

Permeability of Clay-Modified Fly Ash under Thermal Gradients, Lorraine N. Fleming and Hilary I. Inyang, MT Aug. 95, p178-182.

Composite structures

Use of Composites for Rehabilitation of Steel Structures—Determination of Bond Durability, V. M. Karbhari and S. B. Shulley, MT Nov. 95, p239-245.

Compression

Acoustic-Emission Kaiser Effect in Fly-Ash Cement Mortar under Compression, M. T. Tam and C. C. Weng, MT Nov. 95, p212-217.

Compression Creep of Pultruded E-Glass-Reinforced-Plastic Angles, Ghyslaine McClure and Yaghoub Mohammadi, MT Nov. 95, p269-276.

Laboratory Investigation of Compacted No-Fines Concrete for Paving Materials, Nader Ghafoori and Shivaji Dutta, MT Aug. 95, p183-191.

Compressive strength

Minimum Length of Curing of Silica Fume Concrete, Mohammad Shamim Khan and Michael E. Ayers, MT May 95, p134-139.

Concrete

Correspondence Principle for Characterization of Asphalt Concrete, Y. R. Kim, Y. C. Lee and Y. R. Kim, MT Feb. 95, p59-68.

Dielectric Properties of Portland Cement Concrete at Low Radio Frequencies, I. L. Al-Qadi, O. A. Hazim, W. Su and S. M. Riad, MT Aug. 95, p192-198.

Evaluation of Plastic Damage in Concrete by Acoustic Emission, Ahmed M. Farahat and Masayasu Ohtsu, MT Aug. 95, p148-153.

Evaluation of Polymer-Modified Asphalt Concrete Mixtures, Xicheng Qi, Peter E. Sebaaly and Jon A. Epps, MT May 95, p117-124.

Experimental Observation of Microstructural Behavior of Concrete, Ahmed M. Farahat, Masashi Kawakami and Tada-aki Tanabe, MT May 95, p87-95.

Fracture Energy Determination of Quasi-Brittle Materials, Robert Y. Liang and Yuan-Neng Li, MT Aug. 95, p168-173.

Interdependence of Creep and Shrinkage for Concrete under Tension, Konstantin Kovler, MT May 95, p96-101.

Minimum Length of Curing of Silica Fume Concrete, Mohammad Shamim Khan and Michael E. Ayers, MT May 95, p134-139.

Review of Expansive Alkali-Aggregate Reactions in Concrete, J. E. Gillott, MT Nov. 95, p278-282.

Theoretical Prediction of Drying Shrinkage of Concrete, Man Yop Han and Robert L. Lytton, MT Nov. 95, p204-207.

Thermal Expansion of Concretes: Case Study in Iowa, Udeme J. Ndon and K. L. Bergeson, MT Nov. 95, p246-251.

Concrete durability

Applying Covercrete Absorption Test to In-Situ Tests on Structures, G. E. Blight and B. J. Lampacher, MT Feb. 95, p1-8.

Concrete, reinforced

Behavior of Concrete Slabs Reinforced with Fiber-Reinforced Plastic Grid, N. Banthia, M. Al-Asaly and S. Ma, MT Nov. 95, p252-257.

Resistance of Silica-Fume Concrete to Corrosion-Related Damage, Safwan A. Khedr and Ahmed F. Idriss, MT May 95, p102-107.

Two-Dimensional Magnetic Algorithm to Detect Reinforcing Steel, Craig M. Newtson and Marc O. Eberhard, MT Aug. 95, p141-147.

Concrete slabs

Behavior of Concrete Slabs Reinforced with Fiber-Reinforced Plastic Grid, N. Banthia, M. Al-Asaly and S. Ma, MT Nov. 95, p252-257.

Concrete structures

Applying Covercrete Absorption Test to In-Situ Tests on Structures, G. E. Blight and B. J. Lampacher, MT Feb. 95, p1-8.

Connections, bolted

Bolted Connections for Fiber-Reinforced Composite Structural Members: Analytical Model and Design Recommendations, Charles N. Rosner and Sami H. Rizkalla, MT Nov. 95, p232-238.

Bolted Connections for Fiber-Reinforced Composite Structural Members: Experimental Program, Charles N. Rosner and Sami H. Rizkalla, MT Nov. 95, p223-231.

Constitutive models

Correspondence Principle for Characterization of Asphalt Concrete, Y. R. Kim, Y. C. Lee and Y. R. Kim, MT Feb. 95, p59-68.

Construction materials

Kuwait Oil-Based Pollution: Effect on Building Material, Naji M. Al-Mutairi, MT Aug. 95, p154-160.

Contamination

Kuwait Oil-Based Pollution: Effect on Building Material, Naji M. Al-Mutairi, MT Aug. 95, p154-160.

Corrosion

Resistance of Silica-Fume Concrete to Corrosion-Related Damage, Safwan A. Khedr and Ahmed F. Idriss, MT May 95, p102-107.

Cracks

Experimental Observation of Microstructural Behavior of Concrete, Ahmed M. Farahat, Masashi Kawakami and Tada-aki Tanabe, MT May 95, p87-95.

Fracture Energy and Tension Properties of High-Strength Concrete, H. Marzouk and Z. W. Chen, MT May 95, p108-116.

Interdependence of Creep and Shrinkage for Concrete under Tension, Konstantin Kovler, MT May 95, p96-101.

Creep

Compression Creep of Pultruded E-Glass-Reinforced-Plastic Angles, Ghyslaine McClure and Yaghoub Mohammadi, MT Nov. 95, p269-276.

Interdependence of Creep and Shrinkage for Concrete under Tension, Konstantin Kovler, MT May 95, p96-101.

Curing

Effect of Curing Age on High-Strength Concrete at Low Temperatures, H. Marzouk and A. Hussein, MT Aug. 95, p161-167.

Minimum Length of Curing of Silica Fume Concrete, Mohammad Shamim Khan and Michael E. Ayers, MT May 95, p134-139.

Cyclic loads

Correspondence Principle for Characterization of Asphalt Concrete, Y. R. Kim, Y. C. Lee and Y. R. Kim, MT Feb. 95, p59-68.

Damage

Correspondence Principle for Characterization of Asphalt Concrete, Y. R. Kim, Y. C. Lee and Y. R. Kim, MT Feb. 95, p59-68.

Evaluation of Plastic Damage in Concrete by Acoustic Emission, Ahmed M. Farahat and Masayasu Ohtsu, MT Aug. 95, p148-153.

Deformation

Evaluation of Polymer-Modified Asphalt Concrete Mixtures, Xicheng Qi, Peter E. Sebaaly and Jon A. Epps, MT May 95, p117-124.

Deicing

Method for Determining Ice Undercut Temperature of Deicing Chemicals, Morris Mauritis, James McGraw and Ji-Won Jang, MT Feb. 95, p84-86.

Desiccation

Interdependence of Creep and Shrinkage for Concrete under Tension, Konstantin Kovler, MT May 95, p96-101.

Design criteria

Bolted Connections for Fiber-Reinforced Composite Structural Members: Analytical Model and Design Recommendations, Charles N. Rosner and Sami H. Rizkalla, MT Nov. 95, p232-238.

Deterioration

Evaluation of Plastic Damage in Concrete by Acoustic Emission, Ahmed M. Farahat and Masayasu Ohtsu, MT Aug. 95, p148-153.

Dewatering

Theoretical Prediction of Drying Shrinkage of Concrete, Man Yop Han and Robert L. Lytton, MT Nov. 95, p204-207.

Dielectric constant

Dielectric Properties of Portland Cement Concrete at Low Radio Frequencies, I. L. Al-Qadi, O. A. Hazim, W. Su and S. M. Riad, MT Aug. 95, p192-198.

Differential equations

A Nonlinear Differential Equation for Modeling Asphalt Aging, Norman W. Garrick, MT Nov. 95, p265-268.

Downdrag

Bitumen Coating versus Plastic Sheeting for Reducing Negative Skin Friction, Kamal S. Tawfiq and Joseph A. Caliendo, MT Feb. 95, p69-81.

Ductility

Effect of Welding on Ductility of Rebars, Y. L. Mo and J. Y. Kuo, MT Nov. 95, p283-285.

Dune sands

Soil Modification by Cement Kiln Dust, Z. A. Baghdadi, M. N. Fatani and N. A. Sabban, MT Nov. 95, p218-222.

Dust

Soil Modification by Cement Kiln Dust, Z. A. Baghdadi, M. N. Fatani and N. A. Sabban, MT Nov. 95, p218-222.

Elasticity

Correspondence Principle for Characterization of Asphalt Concrete, Y. R. Kim, Y. C. Lee and Y. R. Kim, MT Feb. 95, p59-68.

Energy

Fracture Energy and Tension Properties of High-Strength Concrete, H. Marzouk and Z. W. Chen, MT May 95, p108-116.

Fracture Energy Determination of Quasi-Brittle Materials, Robert Y. Liang and Yuan-Neng Li, MT Aug. 95, p168-173.

Energy absorption

Behavior of Concrete Slabs Reinforced with Fiber-Reinforced Plastic Grid, N. Banthia, M. Al-Asaly and S. Ma, MT Nov. 95, p252-257.

Expansion

Review of Expansive Alkali-Aggregate Reactions in Concrete, J. E. Gillott, MT Nov. 95, p278-282.

Thermal Expansion of Concretes: Case Study in Iowa, Udeme J. Ndon and K. L. Bergeson, MT Nov. 95, p246-251.

Fatigue

Correspondence Principle for Characterization of Asphalt Concrete, Y. R. Kim, Y. C. Lee and Y. R. Kim, MT Feb. 95, p59-68.

Review of Expansive Alkali-Aggregate Reactions in Concrete, J. E. Gillott, MT Nov. 95, p278-282.

Soil Modification by Cement Kiln Dust, Z. A. Baghdadi, M. N. Fatani and N. A. Sabban, MT Nov. 95, p218-222.

Fiber reinforced materials

Bolted Connections for Fiber-Reinforced Composite Structural Members: Analytical Model and Design Recommendations, Charles N. Rosner and Sami H. Rizkalla, MT Nov. 95, p232-238.

Bolted Connections for Fiber-Reinforced Composite Structural Members: Experimental Program, Charles N. Rosner and Sami H. Rizkalla, MT Nov. 95, p223-231.

Fiber reinforced plastics

Behavior of Concrete Slabs Reinforced with Fiber-Reinforced Plastic Grid, N. Banthia, M. Al-Asaly and S. Ma, MT Nov. 95, p252-257.

Compression Creep of Pultruded E-Glass-Reinforced-Plastic Angles, Ghyslaine McClure and Yaghoub Mohammadi, MT Nov. 95, p269-276.

Fibers

Bond Properties of Carbon Fibers in Cementitious Matrix, Amnon Katz, Victor C. Li and A. Kazmer, MT May 95, p125-128.

Finite element method

Finite-Element Analysis of Wood Joints, Conrad Jauslin, Patrick J. Pellicane and Richard M. Gutkowski, MT Feb. 95, p50-58.

Fires

Kuwait Oil-Based Pollution: Effect on Building Material, Naji M. Al-Mutairi, MT Aug. 95, p154-160.

Flexible pavements

Evaluation of Polymer-Modified Asphalt Concrete Mixtures, Xicheng Qi, Peter E. Sebaaly and Jon A. Epps, MT May 95, p117-124.

Fly ash

Acoustic-Emission Kaiser Effect in Fly-Ash Cement Mortar under Compression, M. T. Tam and C. C. Weng, MT Nov. 95, p212-217.

Frost Resistance of Roller-Compacted High-Voltage Fly Ash Concrete, Michel Pigeon and V. Mohan Malhotra, MT Nov. 95, p208-211.

Permeability of Clay-Modified Fly Ash under Thermal Gradients, Lorraine N. Fleming and Hilary I. Inyang, MT Aug. 95, p178-182.

Thermal Properties of Polymer Mortar Using Recycled PET and Fly Ash, Karim S. Rebeiz, Amy S. Banko and Andrew P. Craft, MT May 95, p129-133.

Foam

Experimental Investigation of Tensile Fracture in Polyurethane Foams, A. K. Maji, D. Satpathi and S. Donald, MT Nov. 95, p258-264.

Fracture mechanics

Experimental Investigation of Tensile Fracture in Polyurethane Foams, A. K. Maji, D. Satpathi and S. Donald, MT Nov. 95, p258-264.

Fracture Mechanical Behavior of Aggregate–Cement Matrix Interfaces, E. K. Tschegg, H. M. Rotter, P. E. Roelfstra, U. Bourgund and P. Jussel, MT Nov. 95, p199-203.

Fractures

Fracture Energy and Tension Properties of High-Strength Concrete, H. Marzouk and Z. W. Chen, MT May 95, p108-116.

Fracture Energy Determination of Quasi-Brittle Materials, Robert Y. Liang and Yuan-Neng Li, MT Aug. 95, p168-173.

Freeze-thaw cycle

Permeability of Clay-Modified Fly Ash under Thermal Gradients, Lorraine N. Fleming and Hilary I. Inyang, MT Aug. 95, p178-182.

Freeze-thaw durability

Laboratory Investigation of Compacted No-Fines Concrete for Paving Materials, Nader Ghafoori and Shivaji Dutta, MT Aug. 95, p183-191.

Freezing

Method for Determining Ice Undercut Temperature of Deicing Chemicals, Morris Mauritis, James McGraw and Ji-Won Jang, MT Feb. 95, p84-86.

Frost penetration

Frost Resistance of Roller-Compacted High-Voltage Fly Ash Concrete, Michel Pigeon and V. Mohan Malhotra, MT Nov. 95, p208-211.

Gluing

Finite-Element Analysis of Wood Joints, Conrad Jauslin, Patrick J. Pellicane and Richard M. Gutkowski, MT Feb. 95, p50-58.

Grid systems

Behavior of Concrete Slabs Reinforced with Fiber-Reinforced Plastic Grid, N. Banthia, M. Al-Asaly and S. Ma, MT Nov. 95, p252-257.

High strength concretes
Effect of Curing Age on High-Strength Concrete at Low Temperatures, H. Marzouk and A. Hussein, MT Aug. 95, p161-167.
Fracture Energy and Tension Properties of High-Strength Concrete, H. Marzouk and Z. W. Chen, MT May 95, p108-116.

Ice
Method for Determining Ice Undercut Temperature of Deicing Chemicals, Morris Mauritis, James McGraw and Ji-Won Jang, MT Feb. 95, p84-86.

In situ tests
Applying Covercrete Absorption Test to In-Situ Tests on Structures, G. E. Blight and B. J. Lampacher, MT Feb. 95, p1-8.

Infrastructure
Use of Composites for Rehabilitation of Steel Structures—Determination of Bond Durability, V. M. Karbhari and S. B. Shulley, MT Nov. 95, p239-245.

Interfaces
Bond Properties of Carbon Fibers in Cementitious Matrix, Amnon Katz, Victor C. Li and A. Kazmer, MT May 95, p125-128.
Fracture Mechanical Behavior of Aggregate–Cement Matrix Interfaces, E. K. Tschegg, H. M. Rotter, P. E. Roelfstra, U. Bourgund and P. Jussel, MT Nov. 95, p199-203.

Joints
Finite-Element Analysis of Wood Joints, Conrad Jauslin, Patrick J. Pellicane and Richard M. Gutkowski, MT Feb. 95, p50-58.

Kuwait
Kuwait Oil-Based Pollution: Effect on Building Material, Naji M. Al-Mutairi, MT Aug. 95, p154-160.

Laboratory tests
Frost Resistance of Roller-Compacted High-Voltage Fly Ash Concrete, Michel Pigeon and V. Mohan Malhotra, MT Nov. 95, p208-211.
HP-GPC Characterization of Asphalt Aging and Selected Properties, Eleni Vassiliadou Churchill, Serji N. Amirkhanian and James L. Burati, Jr., MT Feb. 95, p41-49.
Laboratory Investigation of Compacted No-Fines Concrete for Paving Materials, Nader Ghafoori and Shivaji Dutta, MT Aug. 95, p183-191.
Method for Determining Ice Undercut Temperature of Deicing Chemicals, Morris Mauritis, James McGraw and Ji-Won Jang, MT Feb. 95, p84-86.

Limestone
Artificial Neural Networks and Durability of Sphinx Limestone, Jayanta K. Bandyopadhyay, Srinivas S. Yerrapragada and K. Lal Gauri, MT Aug. 95, p174-177.
Fracture Mechanical Behavior of Aggregate–Cement Matrix Interfaces, E. K. Tschegg, H. M. Rotter, P. E. Roelfstra, U. Bourgund and P. Jussel, MT Nov. 95, p199-203.

Liners
Permeability of Clay-Modified Fly Ash under Thermal Gradients, Lorraine N. Fleming and Hilary I. Inyang, MT Aug. 95, p178-182.

Load tests
Evaluation of Polymer-Modified Asphalt Concrete Mixtures, Xicheng Qi, Peter E. Sebaaly and Jon A. Epps, MT May 95, p117-124.
Experimental Observation of Microstructural Behavior of Concrete, Ahmed M. Farahat, Masashi Kawakami and Tada-aki Tanabe, MT May 95, p87-95.

Magnetic fields
Two-Dimensional Magnetic Algorithm to Detect Reinforcing Steel, Craig M. Newtson and Marc O. Eberhard, MT Aug. 95, p141-147.

Mathematics
Theoretical Prediction of Drying Shrinkage of Concrete, Man Yop Han and Robert L. Lytton, MT Nov. 95, p204-207.

Mechanical properties
Experimental Investigation of Tensile Fracture in Polyurethane Foams, A. K. Maji, D. Satpathi and S. Donald, MT Nov. 95, p258-264.

Microstructure
Experimental Observation of Microstructural Behavior of Concrete, Ahmed M. Farahat, Masashi Kawakami and Tada-aki Tanabe, MT May 95, p87-95.
Interdependence of Creep and Shrinkage for Concrete under Tension, Konstantin Kovler, MT May 95, p96-101.

Mixing
Resistance of Silica-Fume Concrete to Corrosion-Related Damage, Safwan A. Khedr and Ahmed F. Idriss, MT May 95, p102-107.

Mixtures
Minimum Length of Curing of Silica Fume Concrete, Mohammad Shamim Khan and Michael E. Ayers, MT May 95, p134-139.

Modeling
Bolted Connections for Fiber-Reinforced Composite Structural Members: Analytical Model and Design Recommendations, Charles N. Rosner and Sami H. Rizkalla, MT Nov. 95, p232-238.

Models
Size Effects in Visually Graded Softwood Structural Lumber, J. D. Barrett, F. Lam and W. Lau, MT Feb. 95, p19-30.

Modulus of elasticity
Laboratory Investigation of Compacted No-Fines Concrete for Paving Materials, Nader Ghafoori and Shivaji Dutta, MT Aug. 95, p183-191.

Moisture content
Theoretical Prediction of Drying Shrinkage of Concrete, Man Yop Han and Robert L. Lytton, MT Nov. 95, p204-207.

Monitoring
Acoustic-Emission Kaiser Effect in Fly-Ash Cement Mortar under Compression, M. T. Tam and C. C. Weng, MT Nov. 95, p212-217.

Mortars
Experimental Observation of Microstructural Behavior of Concrete, Ahmed M. Farahat, Masashi Kawakami and Tada-aki Tanabe, MT May 95, p87-95.
Thermal Properties of Polymer Mortar Using Recycled PET and Fly Ash, Karim S. Rebeiz, Amy S. Banko and Andrew P. Craft, MT May 95, p129-133.

Negative skin friction
Bitumen Coating versus Plastic Sheeting for Reducing Negative Skin Friction, Kamal S. Tawfiq and Joseph A. Caliendo, MT Feb. 95, p69-81.

Neural networks
Artificial Neural Networks and Durability of Sphinx Limestone, Jayanta K. Bandyopadhyay, Srinivas S. Yerrapragada and K. Lal Gauri, MT Aug. 95, p174-177.

No-fines concrete
Building and Nonpavement Applications of No-Fines Concrete, Nader Ghafoori and Shivaji Dutta, MT Nov. 95, p286-289.
Laboratory Investigation of Compacted No-Fines Concrete for Paving Materials, Nader Ghafoori and Shivaji Dutta, MT Aug. 95, p183-191.

Nondestructive tests
Applying Covercrete Absorption Test to In-Situ Tests on Structures, G. E. Blight and B. J. Lampacher, MT Feb. 95, p1-8.
Dielectric Properties of Portland Cement Concrete at Low Radio Frequencies, I. L. Al-Qadi, O. A. Hazim, W. Su and S. M. Riad, MT Aug. 95, p192-198.
Two-Dimensional Magnetic Algorithm to Detect Reinforcing Steel, Craig M. Newtson and Marc O. Eberhard, MT Aug. 95, p141-147.

Oils
Kuwait Oil-Based Pollution: Effect on Building Material, Naji M. Al-Mutairi, MT Aug. 95, p154-160.

Pavement deterioration
A Nonlinear Differential Equation for Modeling Asphalt Aging, Norman W. Garrick, MT Nov. 95, p265-268.

Penetration
Methodology for Defining LMS Portion in Asphalt Chromatogram, Kwang W. Kim, James L. Burati, Jr. and Je-Seon Park, MT Feb. 95, p31-40.

Performance evaluation
Performance of Repair Materials Exposed to Fluctuation of Temperature, A. S. Al-Gahtani, Rasheeduzzafar and A. A. Al-Mussallam, MT Feb. 95, p9-18.

Permeability
Applying Covercrete Absorption Test to In-Situ Tests on Structures, G. E. Blight and B. J. Lampacher, MT Feb. 95, p1-8.
Laboratory Investigation of Compacted No-Fines Concrete for Paving Materials, Nader Ghafoori and Shivaji Dutta, MT Aug. 95, p183-191.
Permeability of Clay-Modified Fly Ash under Thermal Gradients, Lorraine N. Fleming and Hilary I. Inyang, MT Aug. 95, p178-182.

Physical properties
HP-GPC Characterization of Asphalt Aging and Selected Properties, Eleni Vassiliadou Churchill, Serji N. Amirkhanian and James L. Burati, Jr., MT Feb. 95, p41-49.

Plasticity
Evaluation of Plastic Damage in Concrete by Acoustic Emission, Ahmed M. Farahat and Masayasu Ohtsu, MT Aug. 95, p148-153.

Plastics
Bitumen Coating versus Plastic Sheeting for Reducing Negative Skin Friction, Kamal S. Tawfiq and Joseph A. Caliendo, MT Feb. 95, p69-81.

Polyethylene
Evaluation of Polymer-Modified Asphalt Concrete Mixtures, Xicheng Qi, Peter E. Sebaaly and Jon A. Epps, MT May 95, p117-124.

Polymers
Thermal Properties of Polymer Mortar Using Recycled PET and Fly Ash, Karim S. Rebeiz, Amy S. Banko and Andrew P. Craft, MT May 95, p129-133.

Polyurethane
Experimental Investigation of Tensile Fracture in Polyurethane Foams, A. K. Maji, D. Satpathi and S. Donald, MT Nov. 95, p258-264.

Pore size distribution
Artificial Neural Networks and Durability of Sphinx Limestone, Jayanta K. Bandyopadhyay, Srinivas S. Yerrapragada and K. Lal Gauri, MT Aug. 95, p174-177.

Portland cements
Dielectric Properties of Portland Cement Concrete at Low Radio Frequencies, I. L. Al-Qadi, O. A. Hazim, W. Su and S. M. Riad, MT Aug. 95, p192-198.
Review of Expansive Alkali-Aggregate Reactions in Concrete, J. E. Gillott, MT Nov. 95, p278-282.

Pull-out resistance
Bond Properties of Carbon Fibers in Cementitious Matrix, Amnon Katz, Victor C. Li and A. Kazmer, MT May 95, p125-128.

Pultrusion
Compression Creep of Pultruded E-Glass-Reinforced-Plastic Angles, Ghyslaine McClure and Yaghoub Mohammadi, MT Nov. 95, p269-276.

Regression analysis
HP-GPC Characterization of Asphalt Aging and Selected Properties, Eleni Vassiliadou Churchill, Serji N. Amirkhanian and James L. Burati, Jr., MT Feb. 95, p41-49.
Methodology for Defining LMS Portion in Asphalt Chromatogram, Kwang W. Kim, James L. Burati, Jr. and Je-Seon Park, MT Feb. 95, p31-40.

Rehabilitation
Use of Composites for Rehabilitation of Steel Structures—Determination of Bond Durability, V. M. Karbhari and S. B. Shulley, MT Nov. 95, p239-245.

Reinforcing steels
Two-Dimensional Magnetic Algorithm to Detect Reinforcing Steel, Craig M. Newtson and Marc O. Eberhard, MT Aug. 95, p141-147.

Resins
Performance of Repair Materials Exposed to Fluctuation of Temperature, A. S. Al-Gahtani, Rasheeduzzafar and A. A. Al-Mussallam, MT Feb. 95, p9-18.
Thermal Properties of Polymer Mortar Using Recycled PET and Fly Ash, Karim S. Rebeiz, Amy S. Banko and Andrew P. Craft, MT May 95, p129-133.

Resistance
Frost Resistance of Roller-Compacted High-Voltage Fly Ash Concrete, Michel Pigeon and V. Mohan Malhotra, MT Nov. 95, p208-211.

Roller compacted concrete
Frost Resistance of Roller-Compacted High-Voltage Fly Ash Concrete, Michel Pigeon and V. Mohan Malhotra, MT Nov. 95, p208-211.

Sandstone
Fracture Mechanical Behavior of Aggregate–Cement Matrix Interfaces, E. K. Tschegg, H. M. Rotter, P. E. Roelfstra, U. Bourgund and P. Jussel, MT Nov. 95, p199-203.

Sheets
Bitumen Coating versus Plastic Sheeting for Reducing Negative Skin Friction, Kamal S. Tawfiq and Joseph A. Caliendo, MT Feb. 95, p69-81.

Shrinkage
Interdependence of Creep and Shrinkage for Concrete under Tension, Konstantin Kovler, MT May 95, p96-101.
Theoretical Prediction of Drying Shrinkage of Concrete, Man Yop Han and Robert L. Lytton, MT Nov. 95, p204-207.

Silica
Minimum Length of Curing of Silica Fume Concrete, Mohammad Shamim Khan and Michael E. Ayers, MT May 95, p134-139.
Resistance of Silica-Fume Concrete to Corrosion-Related Damage, Safwan A. Khedr and Ahmed F. Idriss, MT May 95, p102-107.

Size effect
Experimental Investigation of Tensile Fracture in Polyurethane Foams, A. K. Maji, D. Satpathi and S. Donald, MT Nov. 95, p258-264.
Fracture Energy Determination of Quasi-Brittle Materials, Robert Y. Liang and Yuan-Neng Li, MT Aug. 95, p168-173.
Size Effects in Visually Graded Softwood Structural Lumber, J. D. Barrett, F. Lam and W. Lau, MT Feb. 95, p19-30.

Stabilization
Soil Modification by Cement Kiln Dust, Z. A. Baghdadi, M. N. Fatani and N. A. Sabban, MT Nov. 95, p218-222.

Statistical analysis
Minimum Length of Curing of Silica Fume Concrete, Mohammad Shamim Khan and Michael E. Ayers, MT May 95, p134-139.

Strain
Interdependence of Creep and Shrinkage for Concrete under Tension, Konstantin Kovler, MT May 95, p96-101.

Strength
Artificial Neural Networks and Durability of Sphinx Limestone, Jayanta K. Bandyopadhyay, Srinivas S. Yerrapragada and K. Lal Gauri, MT Aug. 95, p174-177.
Behavior of Concrete Slabs Reinforced with Fiber-Reinforced Plastic Grid, N. Banthia, M. Al-Asaly and S. Ma, MT Nov. 95, p252-257.
Building and Nonpavement Applications of No-Fines Concrete, Nader Ghafoori and Shivaji Dutta, MT Nov. 95, p286-289.
Effect of Welding on Ductility of Rebars, Y. L. Mo and J. Y. Kuo, MT Nov. 95, p283-285.
Experimental Investigation of Tensile Fracture in Polyurethane Foams, A. K. Maji, D. Satpathi and S. Donald, MT Nov. 95, p258-264.
Soil Modification by Cement Kiln Dust, Z. A. Baghdadi, M. N. Fatani and N. A. Sabban, MT Nov. 95, p218-222.

Stress
Interdependence of Creep and Shrinkage for Concrete under Tension, Konstantin Kovler, MT May 95, p96-101.

Stress analysis
Finite-Element Analysis of Wood Joints, Conrad Jauslin, Patrick J. Pellicane and Richard M. Gutkowski, MT Feb. 95, p50-58.

Stress strain relations
Experimental Observation of Microstructural Behavior of Concrete, Ahmed M. Farahat, Masashi Kawakami and Tada-aki Tanabe, MT May 95, p87-95.

Structural members
Bolted Connections for Fiber-Reinforced Composite Structural Members: Analytical Model and Design Recommendations, Charles N. Rosner and Sami H. Rizkalla, MT Nov. 95, p232-238.
Bolted Connections for Fiber-Reinforced Composite Structural Members: Experimental Program, Charles N. Rosner and Sami H. Rizkalla, MT Nov. 95, p223-231.
Size Effects in Visually Graded Softwood Structural Lumber, J. D. Barrett, F. Lam and W. Lau, MT Feb. 95, p19-30.

Structure reinforcement
Effect of Welding on Ductility of Rebars, Y. L. Mo and J. Y. Kuo, MT Nov. 95, p283-285.

Temperature
Method for Determining Ice Undercut Temperature of Deicing Chemicals, Morris Mauritis, James McGraw and Ji-Won Jang, MT Feb. 95, p84-86.

Temperature effects
Effect of Curing Age on High-Strength Concrete at Low Temperatures, H. Marzouk and A. Hussein, MT Aug. 95, p161-167.
Performance of Repair Materials Exposed to Fluctuation of Temperature, A. S. Al-Gahtani, Rasheeduzzafar and A. A. Al-Mussallam, MT Feb. 95, p9-18.

Tensile strength
Fracture Energy and Tension Properties of High-Strength Concrete, H. Marzouk and Z. W. Chen, MT May 95, p108-116.
Thermal Properties of Polymer Mortar Using Recycled PET and Fly Ash, Karim S. Rebeiz, Amy S. Banko and Andrew P. Craft, MT May 95, p129-133.

Tension
Fracture Energy and Tension Properties of High-Strength Concrete, H. Marzouk and Z. W. Chen, MT May 95, p108-116.

Testing
Kuwait Oil-Based Pollution: Effect on Building Material, Naji M. Al-Mutairi, MT Aug. 95, p154-160.
Resistance of Silica-Fume Concrete to Corrosion-Related Damage, Safwan A. Khedr and Ahmed F. Idriss, MT May 95, p102-107.

Tests
Bolted Connections for Fiber-Reinforced Composite Structural Members: Experimental Program, Charles N. Rosner and Sami H. Rizkalla, MT Nov. 95, p223-231.
Bond Properties of Carbon Fibers in Cementitious Matrix, Amnon Katz, Victor C. Li and A. Kazmer, MT May 95, p125-128.
Compression Creep of Pultruded E-Glass-Reinforced-Plastic Angles, Ghyslaine McClure and Yaghoub Mohammadi, MT Nov. 95, p269-276.
Effect of Curing Age on High-Strength Concrete at Low Temperatures, H. Marzouk and A. Hussein, MT Aug. 95, p161-167.
Fracture Energy Determination of Quasi-Brittle Materials, Robert Y. Liang and Yuan-Neng Li, MT Aug. 95, p168-173.

Thermal factors
Thermal Expansion of Concretes: Case Study in Iowa, Udeme J. Ndon and K. L. Bergeson, MT Nov. 95, p246-251.

Thermal properties
Thermal Properties of Polymer Mortar Using Recycled PET and Fly Ash, Karim S. Rebeiz, Amy S. Banko and Andrew P. Craft, MT May 95, p129-133.

Timber construction
Finite-Element Analysis of Wood Joints, Conrad Jauslin, Patrick J. Pellicane and Richard M. Gutkowski, MT Feb. 95, p50-58.
Size Effects in Visually Graded Softwood Structural Lumber, J. D. Barrett, F. Lam and W. Lau, MT Feb. 95, p19-30.

Timbers
Size Effects in Visually Graded Softwood Structural Lumber, J. D. Barrett, F. Lam and W. Lau, MT Feb. 95, p19-30.

Time factors
Effect of Curing Age on High-Strength Concrete at Low Temperatures, H. Marzouk and A. Hussein, MT Aug. 95, p161-167.

Toughness
Experimental Investigation of Tensile Fracture in Polyurethane Foams, A. K. Maji, D. Satpathi and S. Donald, MT Nov. 95, p258-264.

Viscoelasticity
Correspondence Principle for Characterization of Asphalt Concrete, Y. R. Kim, Y. C. Lee and Y. R. Kim, MT Feb. 95, p59-68.

Viscosity
HP-GPC Characterization of Asphalt Aging and Selected Properties, Eleni Vassiliadou Churchill, Serji N. Amirkhanian and James L. Burati, Jr., MT Feb. 95, p41-49.

Waste recycling
Soil Modification by Cement Kiln Dust, Z. A. Baghdadi, M. N. Fatani and N. A. Sabban, MT Nov. 95, p218-222.

Waste utilization
Thermal Properties of Polymer Mortar Using Recycled PET and Fly Ash, Karim S. Rebeiz, Amy S. Banko and Andrew P. Craft, MT May 95, p129-133.

Waves
Dielectric Properties of Portland Cement Concrete at Low Radio Frequencies, I. L. Al-Qadi, O. A. Hazim, W. Su and S. M. Riad, MT Aug. 95, p192-198.

Weathering
Artificial Neural Networks and Durability of Sphinx Limestone, Jayanta K. Bandyopadhyay, Srinivas S. Yerrapragada and K. Lal Gauri, MT Aug. 95, p174-177.

Welding
Effect of Welding on Ductility of Rebars, Y. L. Mo and J. Y. Kuo, MT Nov. 95, p283-285.

Wells
Kuwait Oil-Based Pollution: Effect on Building Material, Naji M. Al-Mutairi, MT Aug. 95, p154-160.

Wooden structures
Finite-Element Analysis of Wood Joints, Conrad Jauslin, Patrick J. Pellicane and Richard M. Gutkowski, MT Feb. 95, p50-58.

X-ray diffraction
Kuwait Oil-Based Pollution: Effect on Building Material, Naji M. Al-Mutairi, MT Aug. 95, p154-160.

Yield stress
Effect of Welding on Ductility of Rebars, Y. L. Mo and J. Y. Kuo, MT Nov. 95, p283-285.
